

ServiTech, Inc. Asset Manager Web App

Dan Morgan

Project Overview

The product:

The Asset Manager is web app to manage a custom database of company assets.

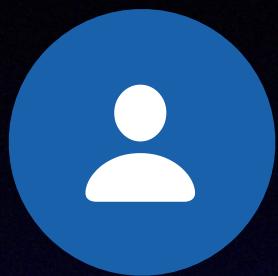

Assets are tracked from purchase through retirement as to what employee or office they're assigned to and the condition at checkout and check-in.

Project duration:

January 2023–Present

Project Overview

My role:

Software Design Leader for the ServiTech, Inc.

Responsibilities:

- Mapped the event triggers
- Wireframed the low fidelity mockups
- Designed the high fidelity prototypes
- Defined the database schema
- Populated the database with employee information

Final Desktop UI

The screenshot shows a Chrome browser window titled "Asset Management" with the URL "https://assets.servitech.com". The main content area is titled "Asset Manager". On the left, there is a sidebar with a "Macbook" category expanded, showing a list of asset items:
