

ServiTech, Inc. Employee Manager Web App

Dan Morgan

Project Overview

The product:

The Employee Manager is a web app to manage a custom database of current (active) and past (inactive) employees.

It is used to feed pick lists in the associated Asset Manager and to populate the Employee Directory.

Project duration:

January 2023–Present

Project Overview

My role:

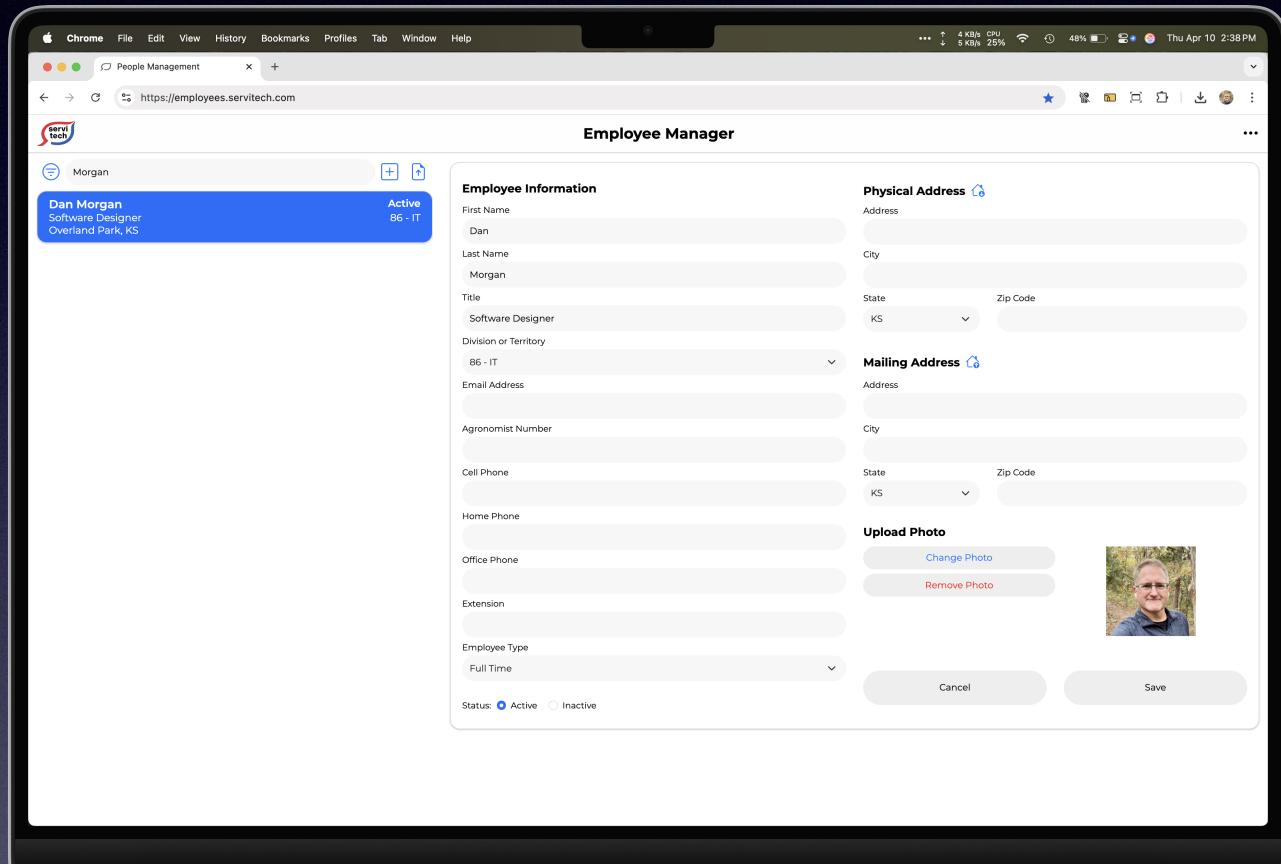

Software Design Leader for the ServiTech, Inc.

Responsibilities:

- Mapped the event triggers
- Wireframed the low fidelity mockups
- Designed the high fidelity prototypes
- Defined the database schema
- Populated the database with employee information

Final Desktop UI

Final Mobile UI
